(Cell Reports 42, 112873; August 29, 2023)

The original ENA upload was missing the majority of the genotypes for the paper's dataset. This has been corrected with a new upload to ENA, so the ENA Analysis access code that appears in the key resources table and the data and code availability section of the published paper is no longer accurate. The correct accession number is [ERZ25071606](https://ena.ebi.ac.uk/ena/record/ERZ25071606). The authors regret this oversight.
