Theory and Application of Network Biology Towards Precision Medicine

Edited by

Barry Demchak, Juan Juxman Bass, Jason Kreisberg

2017 Impact Factor*
4.86

Journal Reports published by Thomson Reuters 2017

NO PUBLICATION FEES - SUPPORTS OPEN ACCESS

See details on our journal homepage

Read the accepted articles in the collection:

- *Synthetic Lethal Networks for Precision Oncology: Promises and Pitfalls* - **John Paul Shen, Trey Ideker**
- *A Proteomic Variant Approach (ProVarA) for Personalized Medicine of Inherited and Somatic Disease* - **Darren M. Hutt, Salvatore Loguercio, Alexandre Rosa Campos, William E. Balch**
- *Patient similarity networks for precision medicine* - **Shraddha Pai** and **Gary D. Bader**
- *The emerging potential for network analysis to inform precision cancer medicine* - **Kivilcim Ozturk, Michelle Dow, Daniel E. Carlin, Rafael Bejar, Hannah Carter**
- *Network-based Disease Module Discovery by a Novel Seed Connector Algorithm with Pathobiological Implications* - **Rui-Sheng Wang**, **Joseph Loscalzo**
- *Drug response prediction by globally capturing drug and cell line information in a heterogeneous network* - **Duc Hau Le**
- *Rationalizing Drug Response in Cancer Cell Lines* - **Teresa Juan-Blanco, Miquel Duran-Frigola, Patrick Aloy**
